* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

* Benefits

Our Background
Armed with nothing more than a few 19th century dairy journals, a small mixer and a passion for simple and natural foods, Drew & Elizabeth McBeth founded Banner Butter in 2012. The founders set out to create a traditional, slow-cultured butter with deep taste and a connection to local, grass-fed dairies. Since inception, Banner Butter has offered the only slow-cultured, batch-churned butter in the south.
Our Ingredients
Grass-fed* our cows nutrition comes from grazing on fresh, green grass, all year round! The dairies we partner with use a rotational grazing approach makes a healthier, tastier butter.
rBST (hormone) free: hormone-free cows are happier and typically produce higher-quality milk.
Our Process
Slow-cultured - In a process that can take 10 times longer than industrial-scale butter, we gently ripen grass-fed cream with a blend of lactobacillus cultures, optimized to coax out subtle acidity and multi-layered, buttery tones. Batch-churned and Batch-worked by using a traditional centrifugal churn and long-working times we can create a high butterfat (85-87%), ultra-creamy butter that spreads beautifully, right out of the package. Cold formed and cut by using a traditional butter former, we keep our butter at a cold temperature throughout the packaging process, avoiding damaging heat which unnaturally hardens industrial-scale, injection-packaged butters.

Ingredients

Pasteurized Cream, Cultures

⚠ Allergens

Contains:
