* Benefits

The Gordal olive, sometimes called Sevillano or Queen olive, is typical of the Seville region of Andalusia in southern Spain and produces a plump, large caliber oval fruit hence the name which translates to the fat one. Gordal are harvested in September and typically have a low yield. Because of their low oil content, they are not used in olive oil production but enjoyed as a table olive instead. Losada cure the whole, natural Gordal in a neutral salt and water brine to achieve a balance between salinity and bitterness allowing the delicate flavor of this variety to come forward. As a large caliber whole olive, these make for an excellent addition to the olive bar.

Ingredients

gordal olives, water, salt, citric acid, lactic acid, ascorbic acid
