* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

* Benefits

Local product made in the French Alps region from local cows milk.
A Brie cheese with natural rind, usually distinguished by its white rind of rye, and incorporates milk cream butter.
The herbives of garlic and herbs for high quality Brie cheese. In coating of herbs gives it a touch of originality! Fresh herbs inside and on the rind of the cheese: garlic, parsley, chives, and chervil inside, and parsley coating.
Aromatic and robust cheese: top seller in the flavored category.
No MSG.
No artificial colors: more phosphorus and protein compared to other soft cheeses thanks to the ultrafiltration process.
Suitable for vegetarians (without rennet).
*The Fromager d'Affinois cheese is made from a unique making process: the ultrafiltration.
The pasteurized milk is directly filtered through very fine membranes that will separate the whey from the curd. This process allows to remove the whey from the curd while at the same time retaining the nutrients and minerals (protein, fat, calcium, etc.). This step replaces the draining phase traditionally used in cheese-making.
The result is then added directly in the production. This unique process replaces the traditional draining phase and retains more nutrients in the final cheese. It is one of a kind cheese making process that no other dairy has been able to reproduce so far.
Guilloteau dairy was created by Jean-Claude Guilloteau in 1982 - French production since.
Wide range of soft cheeses with various flavor profiles.
Compliments with: lightly salted butter, ham, roasted blue cheese will find a cheese to taste.
USA: a very fine rind, a Brie and consistent texture, a delicately characteristic taste.

Ingredients

Cow's milk, Cream, Cheese cultures, Garlic (0,5%), Fines herbs in varying proportions 1,5% (chive, parsley, chervil), Salt, Pepper, Microbial enzymes
