* Benefits

A cheese inspired by nature and the legendary traditions of Central Switzerland. "Fluehbleml / Swiss Rockflower" (Primula auricula) are yellow alpine flowers that grow and find their way under humble conditions among craggy limestone rocks. Mainly found along the Swiss Pre-Alp region also on the slopes of Mountain Dairy Kleinsteins home mountain Pilatus massif - they have delighted many hikers hearts. They are signs of the times and recall the legend of the "Wildmannen" who once lived here in caves. Some of them tended to chamois which are the alpine cousin of many goat species. Back then, the chamois fed on these alpine flowers and from their milk they made cheese. When the weather allowed it, the Wildmannen went down to the valley to help the farmers with their work. In return, they were rewarded with food and cows milk. Thus, they were also able to process this cow's milk they into cheese.

Ingredients

Cow's milk, lactic starter, salt, rennet
