#### \* Benefits

Don't let the name fool you. Known for it's supreme melting ability, Pasteurized Process American Cheese is made with natural cheese and has a very strict standard of identity that features a lower moisture content and higher fat composition than of other "lesser styles" of American Cheese. Pasteurized Process American Cheese is also known as real, traditional or deluxe American Cheese. It is made from natural cheese, milk fat (butter), salt, water and other ingredients, but has an unfair stigma that is commonly associated with the proper name process that the Department of Food and Drug Administration (FDA) has assigned to it.
